

i am elderly and disabled . absentee voting helped me to stay home where it is safe. i went to the polls and the workers there were not very helpful. i felt like they did not care. i had to ask about everything. during covid i got an absentee paper, filled it out and mailed it. it was easy. but someone called and asked me to vote. i said i already have. that was the only problem. i think i could have voted twice. to have secure voting is important. i vote every election. they should have voter i.d. or some way to be sure, one person one vote.

thank you
